Trends that shape the future of L2 card & mobile brand testing.

Contactless payments

75%①

of all Mastercard transactions across Europe are now contactless.

Digital & open finance

30%②

Fintech & Neobanks are leveraging cards and payment apps in their portfolio.

Authentication

90%③

Cardholders wanted to upgrade to the biometric card, if offered.

Multi-functional card

16%④

eSIM market is expected to register a CAGR of 16% from 2020 to 2025.

Global+

① Mastercard. Usability research. 2017.　② Statistica　③ Mastercard. Research 2019.　④ Mordor intelligence 2020.

4

Today's card & mobile functional testing challenges.

Productivity

Quick tool set-up
- no dongle license
- no software installation

Automated testing
- command line execution

Time to market
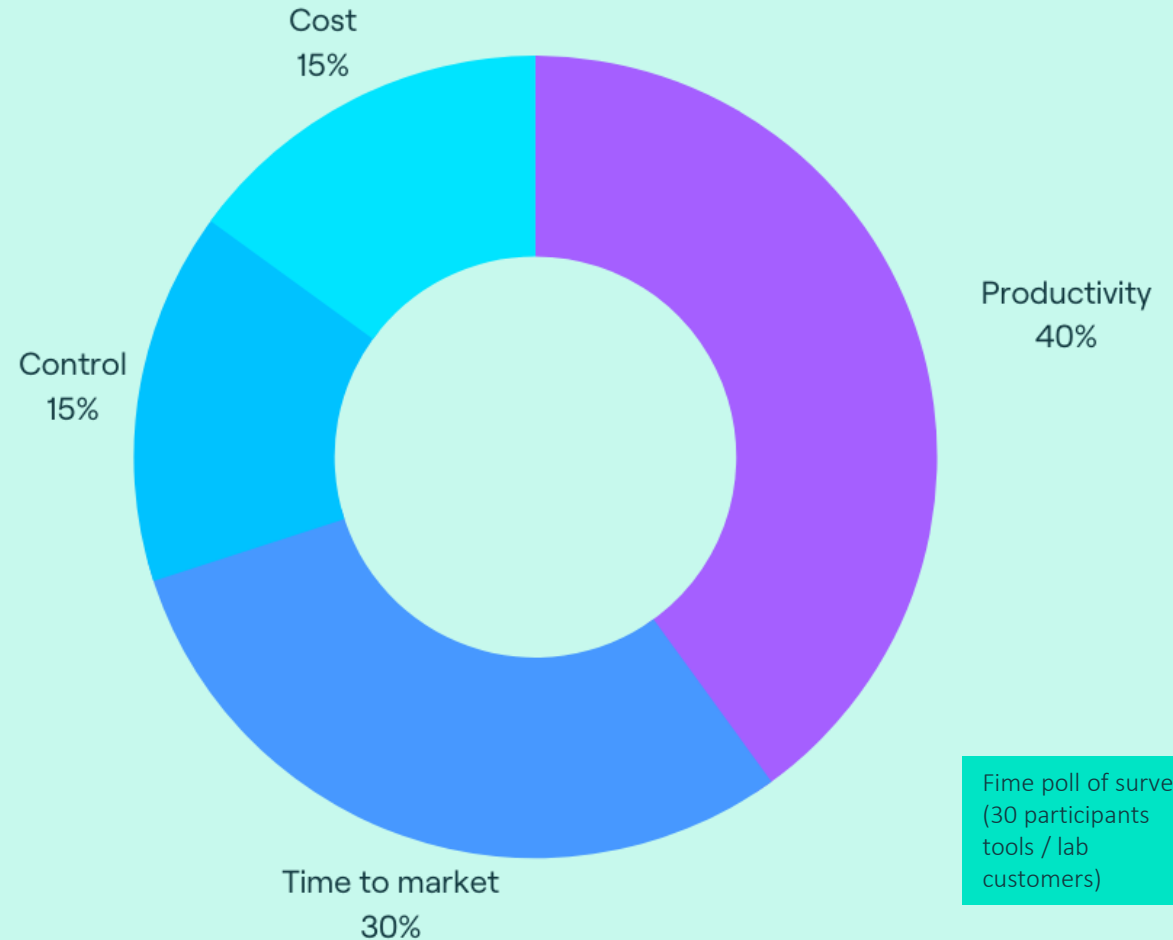

Be constantly in sync with the latest schemes specifications

Remote & online expertise experts prior and during Debug/Type Approval

Control

Build and structure global test team faster (access user management)

Access any System Under Test remotely, anytime, anywhere

Cost

Predictable licensing & test services costs

Unexpected debug associated cost avoidance (travel, hotel, shipping)

Cost
15%

Productivity
40%

Control

Fime poll of survey (30 participants tools / lab customers)

5

What is your most pressing testing challenges?

a) Automated testing for time to market faster.

b) Get test expert support from outside the company.

c) Manage distributed and multi-project test teams.

d) Improve efficiency of test process.

e) Increase the test coverage.

Global+
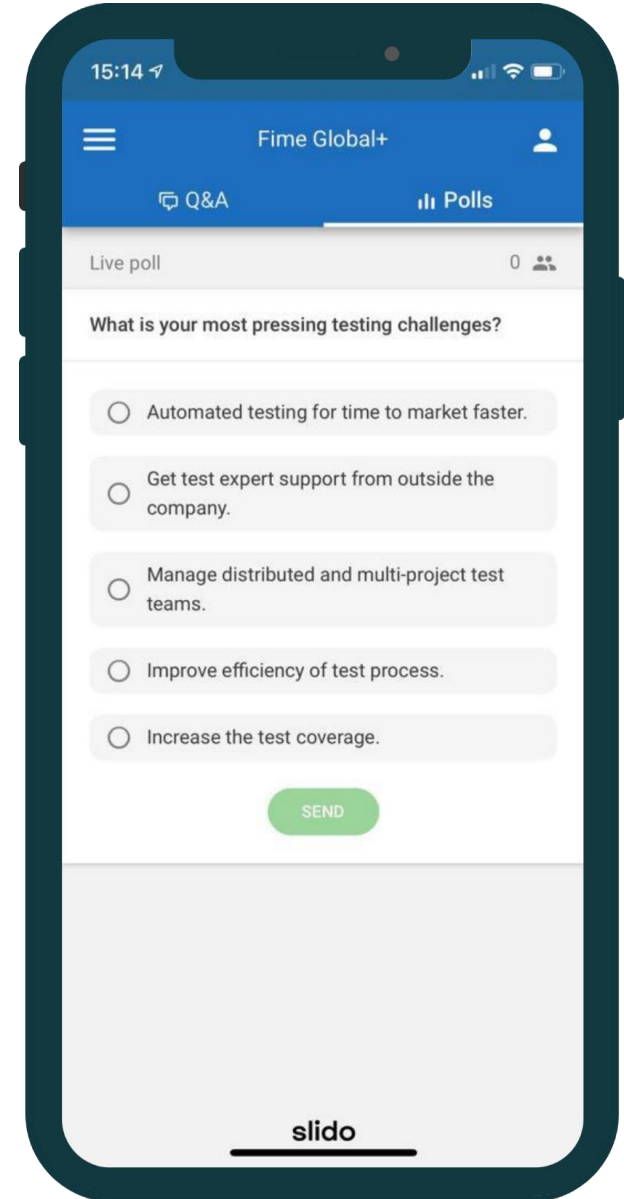

Validating a product development using a scalable and automated platform.

Key benefits

- Officially qualified tool for pre-validation and lab certification.

- Test anywhere using any PC.

- Enhance collaboration between teams located across multiple sites.

- Benefit from a tool that is constantly updated in line with the latest specifications.

- Control testing costs with Fime's annual subscription model, including all specifications updates.

Key features

- Access any System Under Test (SUT) anywhere (Remote SUT testing).

- Integrate with your CI/CD framework.

- Run any test suites using command line scripts.

- Run several test suites at the same time and execute tests in bulk or one by one.

- Test several products simultaneously.

- Share your test view with colleagues (& Fime labs coming).

- Get in-depth logs at a functional and APDU level.

Global+

Live demo.

- As a developer I want to test my eSIM application using GlobalPlatform eUICC Consumer test suite.

- I have organized my testing as follows:
  - One test project composed of 2 test sessions
  - Each test session has different card configuration

- I am working from home and I do not have any sample with me.

- I will ask a colleague to provide me access to his sample remotely.

- As I will be off tomorrow, I will give access to my testing project to a colleague.

Use case:

Remote card testing.

Global+ powered by Fime Test Factory.

Validate payment application using a scalable and automated platform.

Global+

- Enhanced collaboration with a centralized and unified Fime solution into one cloud-based platform offering.

- Improve testing efficiency thanks to value-added modules.

- Access a wide range of expertise online.

- Better control testing costs with new SaaS business model.

- Officially approved by schemes for compliance testing.

- Test suites constantly updated in line with the latest schemes specifications.

MYTEST PROCESS
Create, manage and expose Test- and Certification process

MYTEST STUDIO
Create and manage test cases and plans

MYTEST MANAGER
Manage Test environments, campaigns and resources

MYTEST RECORD
Manage record keeping rules across modules and test environments and perform analysis

MYTEST INTEGRATION
Gateway for continuous integration

Testing capabilities

API Testing, Level 2, Level 3, 3DS

Fime Test Factory 4.0 platform changes the way test is developed, deployed and consumed in the payment world.
