

Issuer Live Testing for Mobile Wallet

Confidently launch your mobile wallet.

Ensure a rich customer experience with end-to-end testing.

Fime Issuer Live Testing ensures your production environment interacts correctly with new cards or mobile wallet applications. Our experts perform transactions on live production for POS terminals to verify the correct behavior of your mobile wallet ecosystem.

Issuer Live Testing for Mobile Wallet can be performed as a certification service or to validate functionalities and user experience outside of a formal certification process.

How it works.

Our experts:

- Explain the testing process.
- Define testing strategy.
- Run staging testing (optional).
- Run production testing.
- Analyze issues.
- Provide final report ready for sharing with the certification authority.

Fime can help you at any stage of your project lifecycle.

Mobile wallet validation services in staging and live environments.
