

MyTest Studio

Accelerate your go-to-market with an online collaborative editor.

Simplify your test plan development and maintenance.

MyTest Studio is a cloud-based test plan editing tool which supports a comprehensive set of test plans including card, terminal, API testing and more. It provides a simple web-based interface to write, organize, generate, review and deploy machine-readable test plans.

To offer real-time collaboration, the editor supports multi-user features where test plans can be accessed simultaneously by different users involved in test plan design, development, review, and launch.

How it works.

- Formalizes high-level test planning and scripting from a test plan designer.
- Generates detailed test plan by developers using a simple web interface, thanks to the multi-user feature.
- Enables test plan review and approval from the reviewing authority.
- Produces coherent and consistent machine-readable test plans.

Fime can help you at any stage of your project lifecycle.
