fime

Eval+

Be ready for Level 2 payment terminal certification.

Level 2 payment terminal compliance test tool.

Used by Fime Labs

Overview.

Fime used it's extensive experience in the payments industry and in-depth knowledge of payments standardization bodies to develop **Eval+** and ensure the complete validation of your products.

Ensure your terminal is ready for payment scheme approval.

To launch innovative and interoperable products efficiently, kernel developers, SoftPOS and POS terminal manufacturers must confirm compliance with the latest payment and transit specifications. **Eval+** allows you to validate the functional compliance of your terminals against the most extensive range of payment schemes to reduce costs, mitigate risks and ensure consistency.

How it works.

Eval+ includes a cloud-based software platform, test suites, and a Probe+ hardware device which connects to the user's PC. Simply connect to the test environment via subscription user account, and use Probe+ to emulate test cards to perform transactions, then get transaction results.
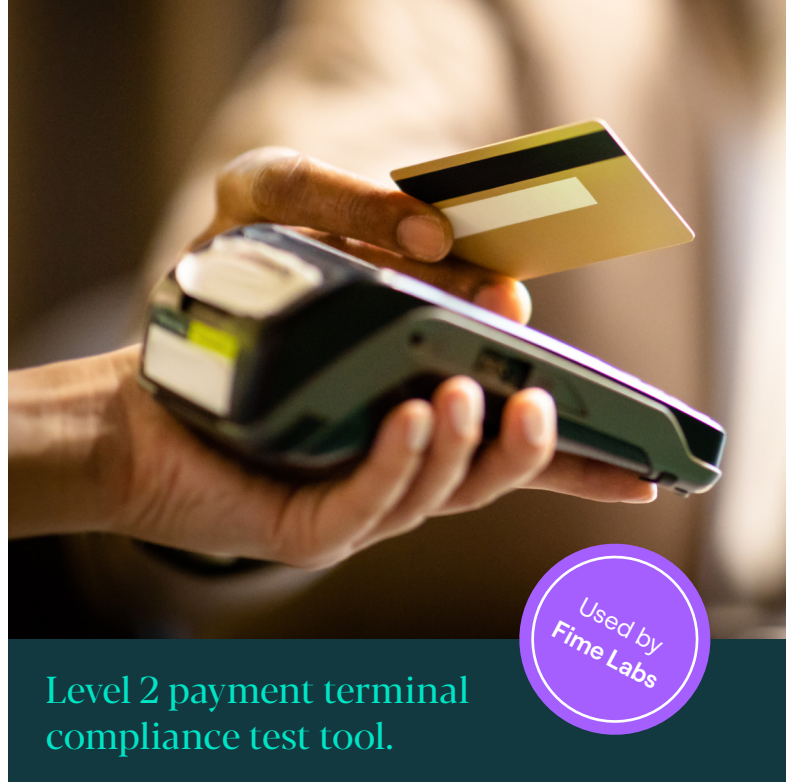

Fime can help you at any stage of your project lifecycle.

Define   Design   Deliver   Test

Key benefits

- Enhance collaboration between distributed teams located across multiple sites and from home.
- Benefit from constant updates in line with the latest specifications.
- Reduce your time to market by accessing different test suites at the same time.
- Save time and money with our automated test tool for in-house development.
- Secure information management certified by ISO 27001.
- Test your product anywhere, using different PCs.
- Control testing costs with Fime's annual subscription model, including all specifications updates.

Key features

- Customized test cases selection.
- Automated cloud-based test cases execution.
- User-friendly stop-and-resume test functions.
- Automatic ICS importing.
- Automated report generation.
- Failure test points indication.
- Exportable test logs for future analysis.
- Upgradable and scalable software test suites.
- Simultaneous execution on various test suites.

What's in the box?

Probe+ (Eval+ hardware) is delivered in a well-protected suitcase which includes:

- Probe+ device.
- USB cable to connect the Fime Probe+.

How can we help?

Explore our services.

Powered by Fime Test Factory.
Eval+ is compatible with the value added modules:

- MyTestProcess to digitalize certification projects management.
- MyTestStudio to customize testing and create new test cases.
- MyTestRecord to archive a project or a test session and access it in read only mode.

More services.

- **Quick onboarding.**
  Personalized user onboarding training.

- **Remote expertise.**
  Book a slot and share your session with a lab expert.

- **Easy ticketing.**
  Quickly raise a ticket to our team of experts.

- **Remote debug.**
  Access remotely to debug environment and share with our team of experts.
