

Card and Mobile Profile Definition

Select and prepare the best card profile for your business and customers.

Define a card profile that balances compliance and business requirements, quickly and securely.

We help you find the profile that meets your preferences and constraints, complies with latest payment network specifications and delivers an harmonized user experience for all payment brands.

How it works.

- Support you to clearly define your business requirements with a tailored questionnaire.
- Analyze and assess the constraints on your implementation.
- Fine tune your requirements based on payment network compatibility.
- Provide a card profile document listing all card parameters.

Fime can help you at any stage of your project lifecycle.

Card & mobile profile definition testing services.
