

MyTest Record

Securely manage your pre-compliance & compliance records.

A smart storage solution tailored to meet your product certification and compliance record-keeping needs.

MyTest Record is a smart cloud-based storage solution to organize your test reports effectively with easy data storage and tool configurations.

It allows users to set their own record-keeping rules and save and maintain data and session configurations in their preferred location. It also offers smart record analysis and file audit support.

How it works.

- Tailors record-keeping options for your testing and certification needs.
- Sets record-keeping rules and configures record retention periods.
- Tracks usage and storage logs.
- Stores and maintains your test records on your preferred location.
- Performs analysis for efficient record keeping.

Fime can help you at any stage of your project lifecycle.

Cloud-based, safe and smart record keeping

Used by Fime Labs

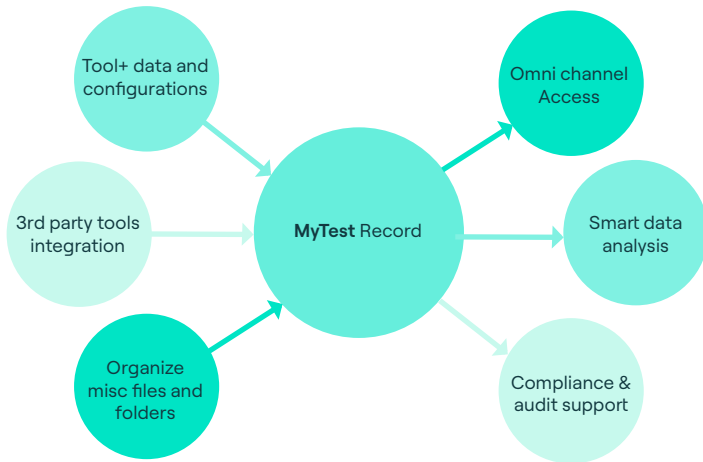

Key benefits

- Organize data effectively by combining qualified test suites with safe record-keeping.
- Access records beyond your testing tool subscription.
- Simplify the recertification process by saving and rerunning test sessions with old configurations.
- Access end-to-end audit support, where activities performed on logs and reports can be tracked.
- Benefit from smart record analysis.

Key features

- Save and restore old test session configurations.
- Configure record retention periods.
- Manage records / software test samples.
- Use read-only mode as per compliance requirements.
- Store data locally and in the cloud.
- Retain records and configurations beyond your Tool+ subscription.
- Employ smart record analysis.
- Use built-in testing and productivity tools.
