

MyTest Integration

Round the clock
test deployment and
execution.

Automate Fime's product testing
solutions with secure API integration
and full CI/CD support.

MyTest Integration is a cloud-based add-on tool that enables access to a variety of Fime test solutions. This includes EMV 3DS authentication and all L2, and L3 test tool solutions. It enables round the clock machine-to-machine testing by connecting Fime test tools with the CI/CD pipeline using any industry standard CI/CD tool. It can fully automate regression and bulk testing. Deploying and integrating scripts instantly, **MyTest Integration** helps reduce test execution time and costs.

How it works.

- Customer requests an API KEY.
- Customer creates the CI/CD script to consume MTI.
- Customer adds the acceptance criteria into the script.
- Customer defines the CI/CD stage.
- The script calls MTI services.
- The script gathers MTI Tool service results and processes to the acceptance criteria.
- The script instructs the pipeline on the verdict.

Fime can help you at any stage of your project lifecycle.

Define

Design

Deliver

Test

Secure API integration with a fully
automated testing tool.

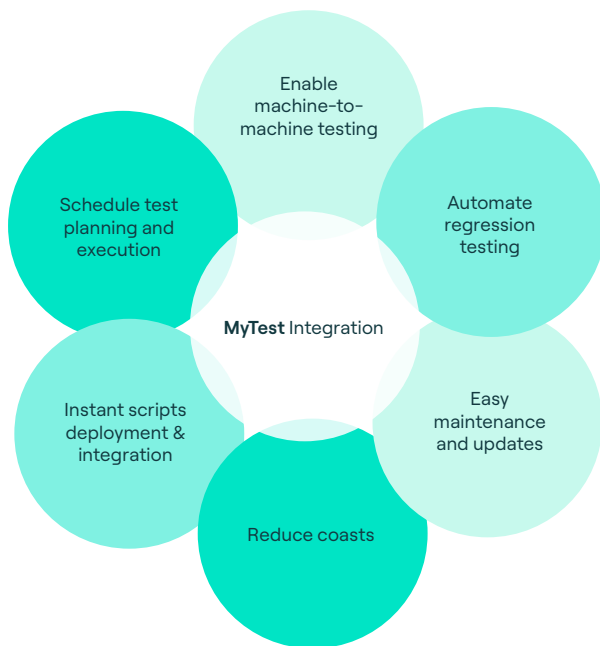

Key benefits

- Deploy and execute tests round the clock.
- Save up to 90% on product development and testing costs.
- Reduce test set-up and execution time.
- Benefit from easy tool maintenance and quick updates.
- Automate regression and bulk testing.

Key features

- Enables machine-to-machine testing through secure API integration and CI/CD implementation.
- Accesses a variety of Fime test solutions through the CI/CD pipeline.
- Facilitates pre-scheduled test planning and execution.
- Provides instant and secure third-party script integration.
- Connects all Fime testing tools with seamless integration.

MyTest Integration at a glance.

What's in the box?

MyTest Integration is a test automation API that allows you to automate your chosen Fime test solutions using your preferred CI/CD tool.

Hardware is not required to use MTI but your chosen Fime test tool or test suites may require that test hardware is required.

Test Suites.

MyTest Integration can be used with any of Fime's test solutions:

- **EMV® 3-D Secure Test Platform** for enhanced card-not-present authentication testing.
- **L2 Eval+** for twerterminal testing.
- **L2 Global+** for card testing.
- **L3 SAVVI Test Platform** for terminal brand testing.

Making innovation possible.
Making the world work.
