

Master the future of digital identity and the EUDI Wallet

This comprehensive training course provides a structured and practical introduction to the European Digital Identity (EUDI) Wallet ecosystem, combining regulatory context with technical and business perspectives.

Participants will gain the knowledge needed to understand how the EUDI Wallet will reshape digital identity across Europe and what it means for organizations preparing to issue, verify, or rely on digital credentials. By the end of this masterclass, participants will be empowered to evaluate the impact on their business, engage confidently with implementation projects, and make informed decisions on their EUDI Wallet strategy.

Objectives

- Understand the EUDI Wallet regulatory framework and the responsibilities of key ecosystem participants
- Explore the wallet architecture, core technologies, and interoperability standards
- Identify practical use cases and implementation considerations across different industries
- Recognize opportunities to leverage the EUDI Wallet to enhance digital trust, user experience, and business innovation

Key topics

- EUDI Wallet ecosystem
- eIDAS 2.0 regulation
- Wallet architecture and functionalities
- User control and interoperability
- Stakeholder responsibilities
- Certification and use cases

Audience

This masterclass is designed for professionals across the public sector, EU Member States, and private industries, as well as organizations and consultants involved in strategy, architecture, and integration.

Masterclass program

Online 6 sessions

Session 1 | 2 hours

M1-M4. Foundations, history & legislation

This module provides definition of key concepts and stakeholder roles, and presentation of the evolution from eIDAS 2014 to the 2024 regulation, including key legal texts and implementation timelines.

Session 2 | 2.5 hours

M5-M6. The Architecture (ARF) & user perspective

This session focuses on a technical deep dive into the Architecture and Reference Framework, plus how users interact with the wallet in practice.

Session 3 | 3 hours

M7-M8. Wallet providers & attestation presentation

This module examines the responsibilities and certification obligations of Wallet Providers, and how attestations are presented in remote and proximity use cases.

Session 4 | 2.5 hours

M9-M10. Attestation issuance & providers

This module details the technical flow of attestation issuance and the operational duties of PID and attestation providers.

Session 5 | 2.5 hours

M11-M12. Relying parties & member states

This module covers how relying parties register, request, and manage revocations, and what is expected from EU Member States.

Session 6 | 2.5 hours

M13-M14. EU perspective & certification

This module explains EU level infrastructure and governance, and the certification framework linked to cybersecurity regulations.

Implementation timeline

Organizations are actively preparing to meet eIDAS mandates initiatives but face uncertainty as specifications, laws and standards are evolving which impacts design, implementation and ultimately interoperability.

eIDAS mandates a series of milestone dates by which time different stakeholder must be compliant:

2026 | Member States

- Deliver at least one interoperable EUDI Wallet
- Ensure wallet certification and compliance with the adopted technical standards
- Make wallets available to citizens and businesses

2027 | Relying parties

The EUDI Wallet will be mandatory across regulated sectors, including banking, telecommunications, healthcare and transport.

Ongoing | Trust service ecosystem

Support issuance, verification, and interoperability of attestations and attestations across the EU.
